DISEASE: Defects in SLC25A4 are a cause of autosomal dominant progressive external ophthalmoplegia with various mitochondrial DNA deletions (PEO). Patients with PEO have mitochondrial mypathy, progressive external ophthalmoplegia, and other abnormalities associated with multiple different deletions of mitochondrial DNA.

SIMILARITY: Belongs to the mitochondrial carrier family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                GO:0006832; P:small molecule transport; erPro; IPR002067; Mit_carrier. erPro; IPR002030; Mit_uncoupling. erPro; IPR001993; Mitoch_carrier.

DOMAIN: Composed of three homologous domains.
SIMILARITY: Belongs to the mitochondrial carrier family.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        FUNCTION: Catalyzes the exchange of ADP mitochondrial inner membrane.
SUBUNIT: Homodimer (By similarity).
SUBCELLULAR LOCATION: Integral membrane

Patent No. 6013030

Patent No. 6013030

GEMERAL INFORMATION:
APPLICANT: Wallace, Douglas C.
APPLICANT: Wallace, Brett H.
APPLICANT: MacGregor, Grant R.
TITLE OF INVENTION: Mouse Lacking Heart-Muscle Adenine
TITLE OF INVENTION: Mouse Lacking Heart-Muscle Adenine
TITLE OF INVENTION: Mouse Lacking Heart-Muscle Adenine
TOURBER OF SEQUENCES: 11
CORRESPONDENCE ADDRESS:
ADDRESSEE: Greenlee, Winner and Sullivan, P.C.
STREET: 5370 Manhattan Circle, Suite 201
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Sequence 48, Application US/09434354

Patent No. 6562563

GENERAL INFORMATION:

APPLICANT: Murpby, Anne N.

APPLICANT: Clevenger, William

APPLICANT: Clevenger, William

APPLICANT: Holeyev, Alexander Y.

APPLICANT: Frigeri, Luciano G.

APPLICANT: Velicelebi, Gonul

APPLICANT: Velicelebi, Gonul

APPLICANT: UNENTION: COMPOSITIONS AND METHODS FOR DETERMINING

TITLE OF INVENTION: INTERACTIONS OF MITOCHONDRIAL COMPONENTS, AND FOR

TITLE OF INVENTION: IDENTIFYING AGENTS THAT ALTER SUCH INTERACTIONS

FILE REFERENCE: 660088.433

CURRENT FILING DATE: 1999-11-03

NUMBER OF SEQ ID NOS: 54

SOPTWARE: FastSEQ for Windows Version 3.0

LENGTH: 298

TYDE: DET
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Ş

Patent No. US20010044144A1
Patent No. US20010044144A1

GENERAL INFORMATION:
APPLICANT: Anderson, Christen M.
APPLICANT: Davis, Robert E.
APPLICANT: Willer, Robert E.
APPLICANT: Willer, Scott W.
APPLICANT: Woos, Walter H.
APPLICANT: Moos, Walter H.
APPLICANT: Pel, Yazhong
APPLICANT: Pel, Yazhong
APPLICANT: Pel, Yazhong
APPLICANT: NOVEL ANT LIGANDS AND SCREENING ASSAYS THEREFOR
FILE REFERENCE: 66088.42014
CURRENT PILING DATE: 2001-03-14
CURRENT FILING DATE: 2001-03-14
UNDBER OF SEQ ID NOS: 37
SOFTWARE: FastSEQ for Windows Version 3.0
SEQ ID NO 32
SEQ ID NO 32
LENGTH: 298
TYDE: DOTT
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             APPLICANT: Clevenger, William
APPLICANT: Wiley, Sandra Elleen
